Aman Kumar Rai

Buxar, Bihar | +91 9801368662 | aman.kumar.rai1203@gmail.com | linkedin | GitHub | Portfolio

Education

United College of Engineering & Research, Prayagraj 2023 – 2027
Bachelor of Technology, Computer Science and Engineering *CGPA: 7.20/10*

Experience

Data Analyst Intern May 2026 – Jul 2026
Bluestock Fintech
- Cleaned, preprocessed and explored mutual fund datasets (NAV, AUM, SIP inflows, fund performance, investor transactions) using Python, Pandas and NumPy to identify trends across fund categories.

Cybersecurity Intern Jul 2025 – Aug 2025
IBM PBEL Virtual Internship (SkillsBuild)
- Completed a structured virtual internship covering threat identification, risk assessment, incident response and core security principles.

Projects

Watch Party – Real-Time YouTube Watch Party FastAPI, Python, WebSockets, SQLAlchemy, SQLite
- Developed a real-time YouTube watch party backend using FastAPI and WebSockets, enabling synchronized video playback and live room updates.
- Implemented room creation, participant management, host transfer, and role-based playback controls with persistent database storage using SQLAlchemy.

Face Recognition Attendance System Python, OpenCV, CustomTkinter, SQLite, PyInstaller
- Built an offline, real-time face recognition attendance system using OpenCV and the Face Recognition library to automatically identify students and log attendance.
- Developed an intuitive desktop GUI with CustomTkinter, adding student record management, automated CSV export and SQLite-backed storage for reliable, persistent data.

Bunk Pro – Smart Attendance Calculator HTML, CSS, JavaScript
- Built and deployed a responsive web app that calculates safe class-bunk limits using dynamic attendance logic, helping students track attendance requirements in real time.
- Designed a clean, mobile-friendly UI and deployed the live app on Vercel.

Notes Summariser – AI-Based Study Tool *HTML, CSS, JavaScript*
- Developed a web application to summarize notes from PDFs, documents, and text inputs into concise and easy-to-understand summaries.
- Implemented text processing logic to generate relevant summaries, helping users quickly extract key information from lengthy study materials.

Nova – Voice Assistant HTML, CSS, JavaScript, Web Speech API
- Developed a web-based AI voice assistant capable of processing voice commands and providing interactive responses.
- Implemented speech recognition and text-to-speech functionality using the Web Speech API for hands-free interaction.

Technical Skills

Languages: Python, Java, SQL
Web Technologies: HTML, CSS, JavaScript, React.js, Bootstrap
Backend & APIs: FastAPI, Flask, REST APIs, WebSockets
Python Libraries: Pandas, NumPy, OpenCV, Face Recognition
Databases: MySQL, SQLite
Tools & Platforms: Git, GitHub, VS Code, Power BI, Vercel, PyInstaller
Core CS: DBMS, Operating Systems, Computer Networks, OOP

Certifications & Learning

GeeksforGeeks POTD Challenge : completed the 60-day streak challenge, powered by NPCI
Data Analyst Internship : Bluestock Fintech
Python : GUVI (HCL & Google for Education Partner)
PBEL Virtual Internship in Cyber Security : IBM SkillsBuild
Python : All India Council for Professional Excellence (AICPE)
Pitching Event 2025 : Entrepreneurship Cell (E-Cell), UCER
